

ASSIGNMENT 1:

CLASSES, OBJECTS AND CONSTRUCTORS:

*/*Classes-A Blueprint for creating objects.*

It defines data and behaviour that object will have.

Object-A real instance of a class.

Constructor-A special method that is automatically called when an object is created.

Used to initialize object values.

It has same name as class name.

It does not have any return type not even void.

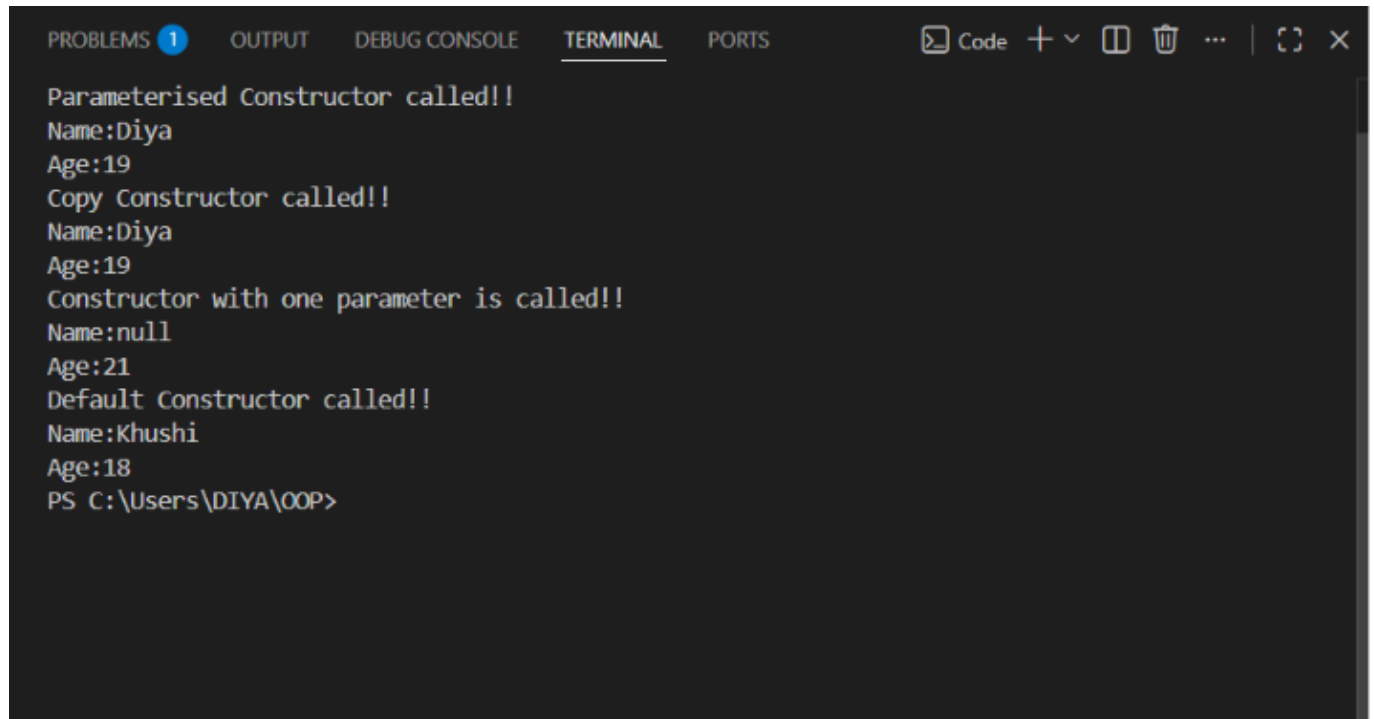

Implement a program to create a class called

"Person" with a name and age attribute. Create two instances of the "Person" class, set their attributes using different types of constructor, and print their name and age. **/*

```
class Person{
    String name;
    int age;
    Person(){
        name="Khushi";
        age=18;
        System.out.println("Default Constructor called!!");
    }
    Person(String n,int a){
        name=n;
        age=a;
        System.out.println("Parameterised Constructor called!!");
    }
}
```

```
}  
Person(int a){  
    age=a;  
    System.out.println("Constructor with one parameter is called!!");  
}  
Person(Person p){  
    name=p.name;  
    age=p.age;  
    System.out.println("Copy Constructor called!!");  
}  
void display(){  
    System.out.println("Name:"+name+"\nAge:"+age);  
}  
}  
public class Assignment1{  
    public static void main(String[] args){  
        Person p1=new Person("Diya",19);  
        p1.display();  
        Person p2=new Person(p1);  
        p2.display();  
        Person p3=new Person(21);  
        p3.display();  
        Person p4=new Person();  
        p4.display();  
    }  
}
```

OUTPUT:

A screenshot of a C++ IDE's terminal window. The terminal has a dark background with light-colored text. At the top, there is a toolbar with icons for 'Code', a plus sign, a minus sign, a square, a trash can, a three-dot menu, and a close button. Below the toolbar, the terminal displays the following output:

```
Parameterised Constructor called!!  
Name:Diya  
Age:19  
Copy Constructor called!!  
Name:Diya  
Age:19  
Constructor with one parameter is called!!  
Name:null  
Age:21  
Default Constructor called!!  
Name:Khushi  
Age:18
